About Me

Final-year Informatics and Computing Engineering student at FEUP with a strong interest in back-end development. Experienced in full-stack development through academic and extracurricular projects, including open-source contributions and mobile apps used by thousands of students.

Education

Faculty of Engineering of the University of Porto
Bachelor in Informatics and Computing Engineering

September 2023 – Expected June 2026

Experience

Armis Group [🔗](#)
Full-stack Engineer Intern

Porto, Portugal
February 2026 – Expected June 2026

- Developer of a centralized full-stack backoffice platform enabling the efficient management and monitoring of Bluetooth beacons for indoor wayfinding systems.

NIAEFEUP [🔗](#)
Member

Porto, Portugal
October 2024 – Present

- Developer of **uni**, a cross-platform Flutter application enabling students to more easily organize their academic life and schedule. Successfully deployed the app to 5,000+ users and currently preparing for scalability and integration into other university faculties.

Projects

PingPong Q&A [🔗](#)

December 2025

- Engineered a scalable collaborative knowledge-sharing platform featuring real-time WebSocket notifications, OAuth authentication, and role-based access control.
- Designed a robust PostgreSQL database architecture utilizing GIN indexes for high-performance full-text search and automated data anonymization workflows.
- Tools Used: Laravel, PHP, PostgreSQL, Docker, WebSockets (Pusher), Tailwind CSS

Inclui [🔗](#)

May 2025

- Developed a mobile application to find and report accessibility problems in public spaces using community data.
- Implemented key features including accessibility-focused search, place reporting system, and user authentication.
- Tools Used: Flutter, Dart, Firebase, Google Maps API, Geolocator

Fallbound [🔗](#)

December 2024

- Developed a text-based 2D platformer game in Java featuring procedurally generated platforms and enemy encounters.
- Applied SOLID principles and rigorous unit testing to ensure high code quality and maintainability.
- Tools Used: Java, Gradle, Spock, Mockito, Lanterna

Skills

Programming Languages: Go, JavaScript, TypeScript, C, C++, C#, Python, Java, Dart, PHP, SQL, HTML, CSS

Frameworks: React, Flutter, .NET Core, FastAPI, Laravel, Tailwind CSS

Databases & Tools: PostgreSQL, SQLite3, Git, Linux

Languages

Portuguese (Native) | English (Fluent)
